Frankfurt Economic Development – profile

Frankfurt Economic Development is the first point of contact for Frankfurt’s businesses, founders and companies planning to set up in the city, irrespective of their size.

We serve as an independent guide and provide customized information on Frankfurt’s economic structure and key industries. Based on the industry get-togethers and networks we have initiated, we put you in touch with other companies as well as associations, communities, and consultants.

As a full subsidiary of the City of Frankfurt/Main, we are an intermediary between business and politics, and ensure that your needs are heard by the political committees. We pursue our goal of creating further growth and jobs by providing active advise to companies and by devising cluster-based economic development strategies. We also give recommendations on economic policy and location-related activities and develop suggestions on how to safeguard Frankfurt’s future as a business location.

Our services are free of charge.
